Rolease: A Multifunctional **Foam Roller That Opens Up to Store Your Essential** Routine Equipment

Rolease: Product Story

Shortly after surgery before his junior season of Division 1 Basketball at the United States Air Force Acedemy, DeLoyell Earls found himself in the training room constantly. The foam roller and stretching strap were just a couple of pieces used to aid his recovery, but there was a problem: traveling with the prescribed foam roller and other rehab tools was an extreme hassle to the point where he neglected to prehab and rehab as he should. He sat in the cold tub pondering, "What if there was a better way?"

Patented | Portable Convenience + Functional Utility

Portable massage foam roller and stretching strap system

9 Liters of storage space to store a yoga mat or your essentials

Click on accessory products and create a new workout platform

Prehab and Rehab at your convenience with a premium foam roller

The Breakdown

The Prevolve team has consulted with industry experts to create a product unlike anything on the market. The USPTO granted the team their Utility Patent on Jan 12, 2021.

Now, the Rolease foam roller is ready for manufacturing, and we are actively looking for the right company to bring it to life and give it the best chance to get in the hands of as many people as possible and make an impact in the fitness world.

Team

DeLovell "D" Earls Founder, Head of Product Air Force Academy Alum 4-year NCAA DI MBB Athlete

Charles Lewis Founder, Head of Growth Air Force Academy Alum

Non-slip bumper and 180 degree hinge system for flat mode on hard, slick surfaces

Magnetic, quick-release system to attach straps or aerobic bands (up to 66lbs per side)

What's Inside?

The patented Rolease foam roller alleviates the tedious task of individually carrying a small gym bag, yoga mat tote, stretching strap, aerobic step, and foam roller.

The Rolease foam roller empowers athletes of all practices and at all levels to carry the tools they need to stay in their practice and reach their full potential.
